Job Description: Software Developer

Location: Bengaluru, India (Hybrid / Remote)
Experience: 2–5 Years

Job Summary

We are looking for a motivated and skilled Software Developer to design, develop, test, and maintain scalable software applications. The ideal candidate should have strong problem-solving skills, a passion for clean code, and the ability to work collaboratively in an agile environment.

Key Responsibilities

- Design, develop, and maintain high-quality software applications
- Write clean, efficient, and reusable code
- Participate in requirement analysis and solution design discussions
- Collaborate with cross-functional teams (Product, QA, DevOps)
- Debug, troubleshoot, and resolve production issues
- Perform code reviews and ensure coding standards are followed
- Contribute to continuous improvement of development processes

Required Skills & Qualifications

- Bachelor’s degree in Computer Science, Engineering, or related field
- Strong programming skills in Java / Python / JavaScript
- Experience with REST APIs and backend development
- Familiarity with databases (MySQL, PostgreSQL, MongoDB, etc.)
- Understanding of OOP concepts and design principles
- Experience working in Agile/Scrum teams
- Good communication and teamwork skills

Preferred Skills (Good to Have)

- Experience with Cloud platforms (AWS / Azure / GCP)
- Knowledge of Microservices architecture
- Exposure to CI/CD pipelines
- Frontend experience with React / Angular
- Familiarity with Docker / Kubernetes

What We Offer

- Competitive salary and benefits
- Learning and career growth opportunities
- Collaborative and inclusive work culture
- Exposure to modern technologies and real-world projects
